

Features

- Watertight cable entry system prevents capillary action and protects against moisture; reduces maintenance costs
- Junction area includes a terminal board for cable connections allowing for fast efficient replacement; area sealed from the stator housing; prevents leakage into the motor; reduces the possibility of failure
- Heavy duty, high efficiency, air filled, Class H
 insulated, rated for 311°F with a 1.10 service
 factor dissipates heat easily; thermal protection in
 each phase of windings protects; operates cooler
 with higher efficiencies; longer service life with lower
 operating costs
- Self cooling jacket eliminates the need for external pumping devices or special heat transfer fluids;
 offers simplicity and high reliability by effectively dissipating heat
- Double and triple row lubricated bearings carry thrust loading with L-10 life of 100,000 hours; ensures long, dependable operation and lowers maintenance costs
- Float type leakage detector provides early warning of mechanical seal failure; avoids costly motor repairs
- Cartridge type, duplex mechanical seals assembled in tandem arrangement; easy maintenance and high reliability
- High efficiency, closed mixed flow impellers large diameter solids; lowers operating costs
- Replaceable case liner ring maintains working clearances while reducing casing costs

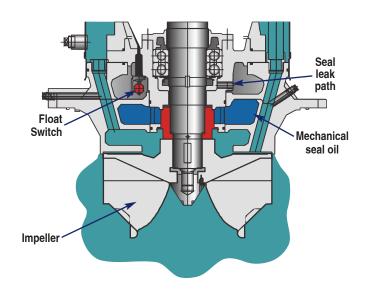

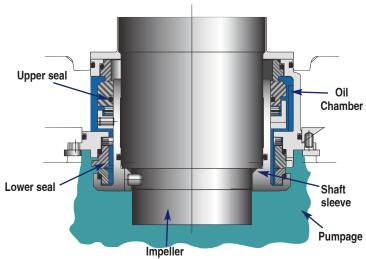

Model DSC3_sealed junction area

Leak detection area

- Upper seal O rings NBR
- Upper seal faces Carbon vs Ceramic
- Lower seal O rings Viton
- Lower seal faces Silicon carbide vs Silicon carbide
- Seal springs 304SS
- Shaft sleeve 304SS

Note: Optional seal face materials available

Standard Specifications

DesignDischarge6 to 24 inchHorsepower30 to 500Capacity530 to 7000 GPMTotal head8 to 300 feetMax. Liquid temp.104°F/40°CMax. Submergence114 feet (35 m)

Speed 1800, 1200, 900, 700, 600 RPM

MaterialsCasingCast IronImpellerCast Iron

Casing Ring 420 Stainless Steel (enclosed Impeller models)

Shaft 403 Stainless Steel
Motor Frame Cast Iron
Cooling Jacket Steel

Fastener 304 Stainless Steel

Construction Impeller Type Enclosed Mixed Flow

Optional: Impeller Ring (enclosed impeller models)

Shaft Seal Cartridge type duplex mechanical seals in

tandem arrangement

Material – Upper Carbon/Ceramic

Material – Lower Silicon Carbide/Silicon Carbide

Optional materials available, consult factory.

Bearing Grease Lubricated Ball Bearing

Motor Class H insulation

Air filled water tight with cooling jacket 15 starts/hour, 1.15 Service Factor

Optional: FM explosion proof, Class 1, Group C, D

60Hz, 460V

Built-in winding temperature detector

Built-in float type leak detector

Optional: Temperature detector for thrust bearing

Mounting method Wet Pit: Quick discharge connector (QDC)

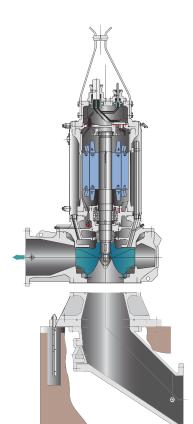

Dry Pit: with baseplate (DSCA4)

Accessories 33 ft. (15.24 m) water tight rubber insulated

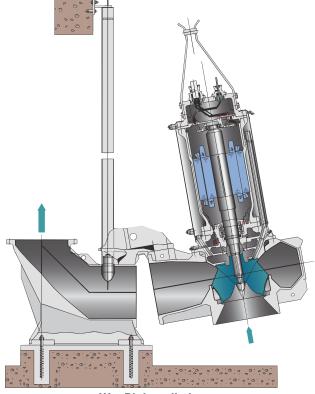

flexible cable

Optional cable lengths available, consult factory.

ISO 9000, ISO 9001

Dry Pit Installation
