

SCOTT'S WATER CO

Why Aeration?

Preserve Your Investment

Maintenance can be a breeze!

The expense of constructing a new pond warrants the need for continued maintenance and the upkeep of your investment.

Beautify your Property

Add spectacular aesthetics!

A Scott Aerator will keep your water sparkling clean, while adding a sense of beauty and prestige to any landscape. The Scott aerator provides exceptional benefits in low-circulation areas where undesirable algae build-up and surface growth are common.

Promote a Healthy Environment

Create a Sparkling Pond

A lack of oxygen in a body of water will provoke fish kills, foul odors, algae growth, and is a major cause in the establishment of stagnant vegetation. Oxygen can easily be added to your pond or lake by using a Scott aerator. Simply put, a Scott aerator integrates dissolved oxygen into your water, facilitating the natural breakdown of decaying vegetation.

Feel Comfortable Knowing Our High Standards

Our systems speak quality.

Every Scott Aerator Company fountain and aerator comes with an unconditional, 5-Year motor warranty, the best in the industry. All of our products are made in the USA of oil-free stainless steel components guaranteed to be the most environmentally friendly water features on the market.

UNQUESTIONABLE

Quality

To solve all of your aeration needs for both fresh and salt water, contact the aeration professionals at Scott Aerator Company today. With over 40 years of experience, Scott Aerator is your solution.

Our Aerators

The "DA-20 Display Aerator"

The "DA-20" Display Aerator is the proven solution for keeping your water sparkling clean while simultaneously providing beauty and healthy aeration.

The "DA-20" is a proven work horse, effortlessly moving up to 400 gallons of water per minute! The vibrant, trumpet shaped spray of the "DA-20" is a functional yet visually appealing water feature which will assist in controlling algae growth and in promoting a healthy aquatic environment.

The "DA-20" is the perfect design solution for commercial, municipal, and residential applications, and its rugged stainless steel design makes it ideal for salt water too. The "DA-20" Display Aerator is also available in a 1 1/2hp model, which easily projects a dynamic cascade of water at an amazing rate of up to 600 gallons per minute!

The "Boilermaker"

The "Boilermaker" is an improved high volume floating surface aerator designed for maximum oxygen transfer and water flow.

The low profile design of the "Boilermaker" creates a maximum volume white boil effect of highly aerated water which fish love and algae hates! The heavy-duty design of the "Boilermaker" is ideal for salt water applications and for fresh water use. If pond health is the primary consideration, the "Boilermaker's" large volume of water circulation and the highest oxygen transfer rates makes this water feature the preferred selection.

Fountain shown "Clover" 1 1/2hp

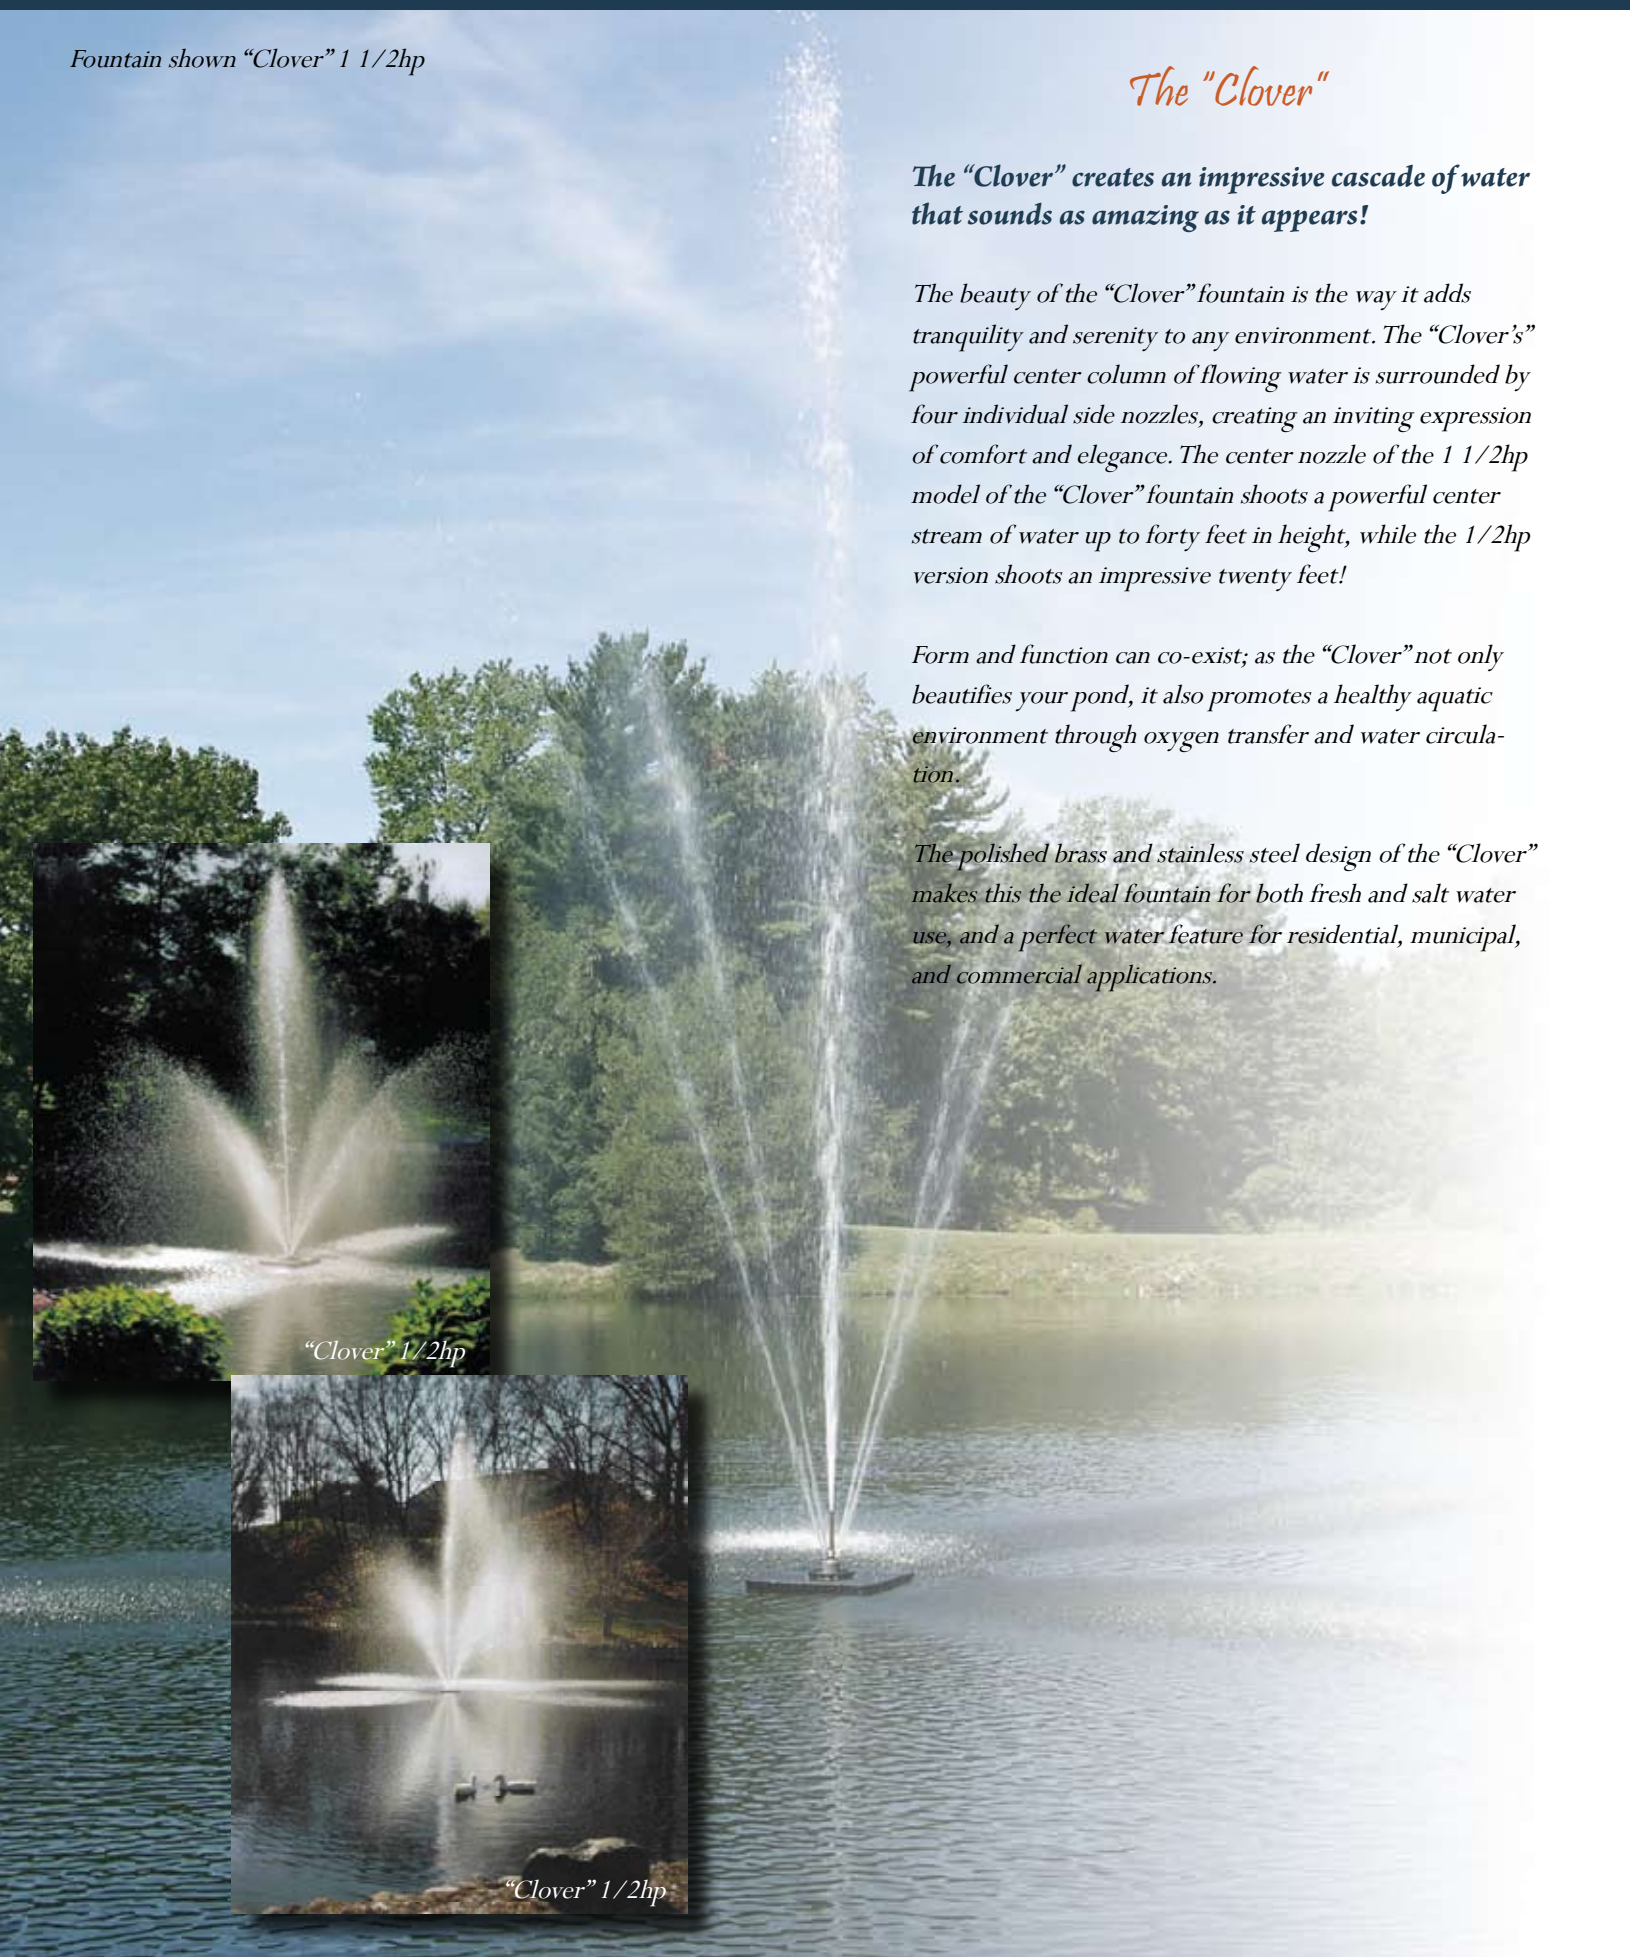

The "Clover"

The "Clover" creates an impressive cascade of water that sounds as amazing as it appears!

The beauty of the "Clover" fountain is the way it adds tranquility and serenity to any environment. The "Clover's" powerful center column of flowing water is surrounded by four individual side nozzles, creating an inviting expression of comfort and elegance. The center nozzle of the 1 1/2hp model of the "Clover" fountain shoots a powerful center stream of water up to forty feet in height, while the 1/2hp version shoots an impressive twenty feet!

Form and function can co-exist; as the "Clover" not only beautifies your pond, it also promotes a healthy aquatic environment through oxygen transfer and water circulation.

The polished brass and stainless steel design of the "Clover" makes this the ideal fountain for both fresh and salt water use, and a perfect water feature for residential, municipal, and commercial applications.

Our Fountains

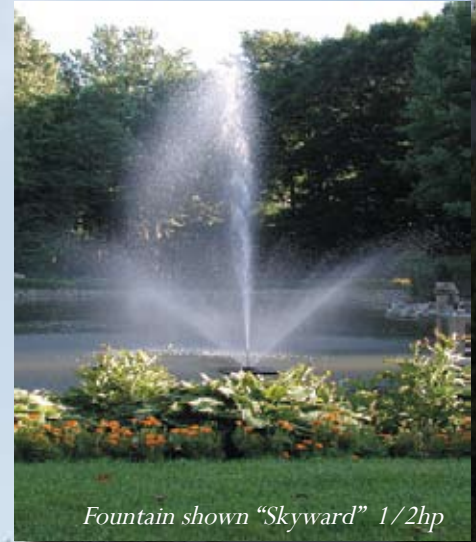

The "Skyward"

The wide, spreading display of the "Skyward" creates a broad water feature that will provide abundant beauty to fill any lake scene.

The "Skyward's" serene display of cascading water adds a sense of tranquility and prestige to any landscape. A trumpet shaped spray surrounds a powerful center column of flowing water, enabling this water feature to create a soothing, relaxing, environment for all types of applications.

The "Skyward's" polished brass center nozzle fully adjusts so that you select your choice of spray pattern, and the rugged stainless steel design is perfect for both fresh and salt water use. The center nozzle of the 1 1/2hp model of the "Skyward" fountain shoots a powerful center stream of water up to forty feet in height, while the 1/2hp version an impressive twenty feet!

The "Skyward" adds beauty while simultaneously promoting a healthy aquatic environment through oxygen transfer and water circulation. The ease of installation and minimal maintenance makes the "Skyward" fountain the ideal water feature for residential, commercial, and municipal locations.

Fountain shown "Gusher" 1 1/2hp

The "Gusher"

The "Gusher" creates an exciting, geyser type vertical column of water in a highly visible, wind-resistant dense pattern.

The frothy and highly aerated cascading stream produced by the "Gusher" is aesthetically pleasing and assists in maintaining water clarity. By adding oxygen to your water, the "Gusher" promotes a healthy aquatic environment while facilitating the natural breakdown of decaying vegetation.

The rapid water movement generated by the "Gusher" provides beauty to your environment while simultaneously assisting to inhibit mosquito breeding. The rugged design and stainless steel construction of this water feature insures that the "Gusher" will provide years of enjoyment, both in fresh and salt water applications.

Benefits are Endless

Fountain Lights

There is nothing more majestic than viewing your fountain or aerator at night, under lights. Scott Aerator offers an easy to install light kit which utilizes heavy duty, shock resistant, water cooled, 120 watt par 38 Halogen floodlights.

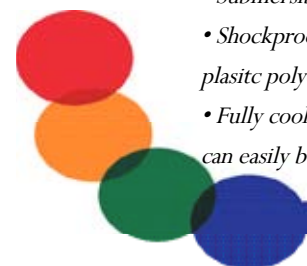

All of our underwater light kits are engineered with:

- *Stainless Steel mounting brackets and hardware.*
- *Submersible 12 gauge electrical cable, 70 feet included!*
- *Shockproof, corrosion and distortion- resistant thermo plastic polyester design.*
- *Fully cooled, pressed glass lamps including bulbs that can easily be changed from the top.*

Enhance your light set with a colored lens kit!

Dramatically enhance your night time viewing enjoyment with the addition of a colored lens kit. Beautifully accents any Scott Aerator water feature, the colored lens kit adds ambiance to any landscape.

Installation is a snap, simply pop the colored lens into place on the lights surface, no hardware or tools required!

Our Fountains

The "Twirling Waters"

Dramatic. Stunning. Dynamic.

These are but a few of the accolades used to describe the "Twirling Waters" fountain. The whimsical spinning movement of the "Twirling Waters" sprays spiraling strands of water upwards of 20 feet, creating a beautiful circular pattern in motion.

The "Twirling Waters" graceful, arching streams create an innovative focal point to any residential or commercial application.

An attractive addition to any pond or lake, the "Twirling Waters" beauty comes in both sight and sound. When accented by our lighting kit, the "Twirling Waters" creates a dramatic and attractive water feature.

Fountain shown "Twirling Waters"

The "Jet-Stream"

When maximum height is desired, the "Jet Stream" fountain is the perfect selection for a high quality yet affordable water feature!

The coherent, vertical spray of the "Jet-Stream" creates a stunning focal point to your lake or pond, it's beauty found in both sight and sound. With heights of up to 35 feet in the 1/2hp version and up to 50 feet in the 1 1/2hp model, the "Jet-Stream's" breathtaking cascade adds a striking statement to any landscape. The impressive display of water generated by the "Jet-Stream" fountain is enhanced with night-time lighting quite effectively.
