

# Easy Pump Systems / Flux Boosting Systems **FBSMS05 15G30P**

## Technical Specifications

It is recommended to install a pressure reducer valve and a surge arrestor when using the FLUX BOOSTING SYSTEM (see manual)

*Before installing the pump, be sure that the maximum flow of the water meter will not be exceeded (see reference).*

REFERENCE	
METER SIZE	MAX FLOW (GPM)
5/8"	12
3/4"	30
1"	40

- Voltage: 230 Volt or 115 Volt
- FLUX protection: Water Resistant
- Water pump protection: Outdoor Use
- Working temperature: 32° -104° F.
- Connections: 1" standard
- Maximum working pressure: 140 psi.
- Minimum flow rate: 0.5 gpm.
