

Overview of Edson's Diaphragm Pump Applications

- PUMP UP TO 50% SOLIDS
- SELF-PRIMING FROM DRY STARTS
- SAFE TO RUN DRY INDEFINITELY
- LOW EMULSIVE & LOW SHEER PUMPING ACTION
- POWERFUL VACUUM LIFTS
- SUCTION LIFTS UP TO 18 FEET
- 2 SIZE PUMPS:
 - 0 TO 20 GPM, 0 TO 40 GPM

Edson diaphragm pumps are primarily designed for the collection and transfer of waste liquids and pumping liquids with suspended solids. All of our diaphragm pumps are capable of handling liquids with large suspended solids without clogging, to prime from dry starts, and to run dry. They have the added feature of low emulsive, non-sheering pumping action. The above list of basic performance features and Edson's 130 year history of manufacturing quality products have made our pumps the choice for cleaning up our environment and controlling the disposal of liquid waste.

MARINE

- Bilge Pumps
- On-Board Holding Tank Pumps
- Pump-Out Stations
- Light Dredging
- Emergency Dewatering
- Boatyard Utility Pump
- Oil Spill Cleanup

INDUSTRIAL

- Sump Pump-Outs
- Slurry Transfer
- Abrasive Pumping
- Filtration Pumping
- Drum Transfer
- Groundwater Containment
- HAZMAT Response
- Drain Dewatering

ENVIRONMENTAL

- Groundwater Remediation
- Tank Pump-Outs
- Grease & Oil Collections
- Well Monitoring
- Asbestos Clean-Ups
- Oil-Water Separation
- Oil Spill Clean-Up

MUNICIPAL

- Sewage Collection & Transfer
- Hydrant Dewatering
- Drain Clean-Out
- Main Break Repair
- Utility Trunk Pump

CONSTRUCTION

- Site Dewatering
- Remediation
- Groundwater Transfer
- Grouting
- Oil Collection

UTILITY

- Fly Ash Cleanups
- Containment Transfer
- Meter Pit Dewatering
- Drain Cleanups
- Manhole Dewatering
